

MORE COMFORTABLE

SomnoDent devices are custom fit by your sleep dentist, just for you and are more comfortable than a standard "As Seen On TV" device. When you're wearing a SomnoDent, you can talk, drink, and close your mouth completely. Your device is discreet and silent, and 90%¹ of people who wear SomnoDent devices say they are comfortable to wear.

HIGH QUALITY

Your SomnoDent device is customized using the highest quality acrylic which won't discolor or attract odors over time. We offer our exclusive soft inner liner for added comfort and quality, and each device has a 1-3 year warranty protecting it against manufacturing defects.

CLINICALLY PROVEN

SomnoMed stands by our quality promise by offering you devices that are proven by more than 15 clinical studies², making each device clinically validated and respected in the medical and dental communities. In one of our studies, 9 out of 10 patients reported improvement in sleep quality while wearing their SomnoDent.¹

INSURANCE COVERAGE

Obstructive Sleep Apnea (OSA) is a medical condition, so medical insurance – not dental insurance – is used to cover the cost of your device. There are even SomnoDent devices created specifically for Medicare, including the SomnoDent Herbst Advance device and the SomnoDent SUAD device.

TOGETHER,

we work with your physician and dentist to create a custom, comfortable device for you that's so easy to wear, you'll have the opportunity to get back to sound, restful sleep faster than you may think.

JOURNEY FROM SLEEPLESS TO WELL RESTED WITH A SOMNODENT DEVICE.

EXPLORE YOUR OPTIONS

Your physician may visit with you prior to your dental visit or as a result of your dental visit. You'll learn about treatment options, including the SomnoDent® device by SomnoMed®. SomnoDent devices are created by SomnoMed and your dentist will custom fit it for your mouth.¹ SomnoDent devices move your lower jaw forward to open your obstructed airway, allowing you to breathe better naturally while asleep.

DENTIST VISIT

When you have your sleep consultation with your dentist, they will take an impression of your teeth and send the impression to SomnoMed to manufacture your device.

YOUR DEVICE FITTING

After a few weeks, your dentists' office will call you to set an appointment so that you may try on your device to ensure it fits well. You'll also receive information on how to insert and remove your SomnoDent device as well as how to clean and care for it yourself.

PHYSICIAN VISIT

Your dentist will refer you back to your sleep physician for a follow-up visit to ensure you are achieving success with your device.

SWEET DREAMS

Using their SomnoDent devices, people around the world have experienced more energy, feel better, begin dreaming again and enjoy restful, satisfying sleep at night.

THE SOMNODENT FAMILY OF DEVICES

Worn during sleep, SomnoDent® devices fit over your upper and lower teeth. The device slightly moves the lower jaw forward, helping to keep the airway open and allowing you to breathe normally.
